

This design project was to create a poster that displayed the meaning of a poem through imagery. The poem I chose was: The Jabberwocky by Lewis Carroll. I used images from the poem to create a poster that visually described the meaning of the poem.

At Lebanon Valley College I studied in the field of Digital Communications with a concentration in programming. Throughout the time I spent at LVC I recieved many different design projects. I participated in the “Doorways To Diversity” project at LVC making a cultural themed door for my client using images she had provided.

My programming experience started at my high school North Schuylkilll located in Fountain Springs, PA. I learned how to code with C++ and Javascript in high school. At Lebanon Valley College I sharpedned my abilities in C++ and Javascript through programming projects. I also learned how to mark-up websites in HTML5 at LVC.
